INTRODUCTION The World at  
Six Billion - United Nations - In  
contemporary Texas, the vast  
majority of population growth  
occurs in metropolitan areas.  
With every decennial census  
since 1850, the state's  
population share in what are  
today's metropolitan counties  
has increased while the  
population share of the  
non-metropolitan counties has  
declined. Sat, 16 Jun 2018

Introduction - Wikipedia - Evolution is the  
process of change in all forms of  
life over generations, and

evolutionary biology is the study  
of how evolution occurs.  
Biological populations evolve  
through genetic changes that  
correspond to changes in the  
organisms' observable  
traits. Genetic changes include  
mutations, which are caused by  
damage or replication errors in  
organisms' DNA. ... Sun, 17 Jun
